- **Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, Recoil, Redux
- **Backend Technologies:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL
- **Version Control:** Git
- **Other Tools:** ShadCn, Rest API

Professional Experience

Software Developer 2024 – Present
North Star Metrics — Kolkata, India

- Developed and maintained scalable web applications using Next.js and React.js, ensuring high performance and responsiveness.
- Collaborated effectively with cross-functional teams, contributing to timely project deliveries and ensuring client satisfaction.
- Managed project tasks, demonstrating strong ownership and accountability in achieving project milestones and deadlines.
- Leveraged modern front-end development best practices to optimize user experience and improve overall application efficiency.

Frontend Developer Trainee & Teaching Assistant 2023 – Sep 2023
FunctionUp

- Trained in React.js with React-Redux and Recoil to build dynamic and responsive front-end applications.
- Gained proficiency in Git for version control and collaboration on software development projects.
- Served as a Teaching Assistant, providing guidance and mentorship to junior trainees, fostering their development in front-end technologies.
- Assisted in the creation of educational materials, ensuring clarity and understanding of complex concepts for trainees.

Projects

PowerHouse - Gym Website

Open Project

Tech Stack: React.js, CSS3

- Developed a responsive gym website using React.js and React-router-dom to create a single-page application (SPA).
- Designed to provide users with essential information to help them achieve health and fitness goals, enhancing user engagement and experience.
- Integrated smooth navigation and modern design elements to improve user interaction.

Twitter Clone

Open Project

Tech Stack: React.js, Material UI, Recoil, CSS3

- Built a Twitter clone app using React.js, Material UI, and Recoil for state management to replicate the core functionality of Twitter.
- Enabled features like posting tweets, liking tweets, and following topics, creating a user experience similar to the original platform.
- Focused on dynamic user interface design, performance optimization, and real-time updates.

Tyreplex

Open Project

Tech Stack: HTML5, Bootstrap

- Developed the Tyreplex website showcasing a catalog of vehicle tyres and accessories with detailed product information.
- Utilized HTML5 and Bootstrap for responsive and mobile-friendly design, ensuring accessibility and a seamless user experience.
- Focused on delivering an easy-to-navigate interface for customers to explore and select automotive products.
